SUMMARY

Android Developer with 1.6+ years of hands-on experience building and maintaining scalable mobile applications using Kotlin and Java. Strong knowledge of MVVM & MVC architecture, REST API integration, Firebase, and Jetpack components. Focused on clean code, performance optimization, and delivering user-centric mobile solutions.

TECHNICAL SKILLS

- Languages: Kotlin, Java
- Android: Android SDK, Jetpack, MVVM & MVC , LiveData, ViewModel, Room
- UI: XML, Material Design
- Networking: REST APIs, Retrofit
- Database: SQLite, Room
- Tools: Android Studio, Git, Firebase

EDUCATION

- BACHELOR'S DEGREE IN COMPUTER SCIENCE**

Centurion University of Technology and Management (CUTM)

2010 - 2014

WORKING EXPERIENCE

- INTERNSHIP**
 - Research Center of Centurion University of Technology and Management
 - Study of Industrial IOT Automation
- SOFTWARE ENGINEER**
Anviam Solutions Private Limited July 2024 - Present
 - Designed, developed, and maintained scalable Android applications using Kotlin and MVVM & MVC architecture, ensuring clean separation of concerns
 - Integrated and managed RESTful APIs using Retrofit, handling authentication, error states, and data parsing efficiently
 - Implemented and maintained Firebase services including Authentication, Cloud Messaging (FCM), and Analytics to support user engagement and app monitoring
 - Proactively improved app performance and stability by debugging complex issues, reducing crash rates, and optimizing network and UI performance
 - Worked cross-functionally with UI/UX designers, backend engineers, and product teams within an Agile/Scrum environment to deliver features end-to-end
